

Learner Success Tips

How to make the most of LinkedIn Learning

Schedule time

1

Adding the time to your calendar or building a habit can drastically improve your commitment to learning for your growth & development.

Access learning on the go

2

With the LinkedIn Learning app, you can watch anytime anywhere – download for a roadtrip or switch audio-only for your daily walk.

Start a 'Course Club'

3

Create a community! Just like a book club, gather your group, pick a topic/course, and join for a virtual or in-person coffee chat about it.

4

Your development has leverage

As you identify the skills or areas of opportunity for your professional growth, use the skills and certificates of completion during performance evaluations.

5

Share your success

Once you complete a course/video share your completion badge on your LinkedIn profile. If you gained skills, make sure to add to your existing set of skills.
